Training Courses to Keep Your Team Safe  
Compliance Software to Streamline Administration

# Online Classroom Calendar

Designed by Training Providers for Training Providers

Manage your instructors, classrooms, workbooks, and individual training events in one powerful online tool. Using the BIStainer centralized cloud-based application, you can set up courses, assign instructors, select classrooms, manage related inventory, and even process payments from any computer, tablet, or smartphone with an internet connection.

## ▶ Classroom Management

Never double book a classroom, instructor, or trainee again.

## ▶ Instructor Management

Easily verify instructor's training qualifications, training certifications, and availability.

## ▶ Course Management

Instantly schedule training events by dragging and dropping courses onto the calendar.

## FEATURES

Registration Management

Blended Learning Technology

Interactive Instructor Dashboard

Integrated eCommerce Engine

Google Maps API

Competency Validation

Invoice Management

QR Code Technology

Inventory Management

Integrated Exam Engine

## Online Training Over 1,700 Engaging Training Courses

Demand for online training continues to increase as new online training standards are set and government regulations change.

BIStainer Learning & Compliance software includes over 1,700 industry-leading online courses. With high-impact videos, animations, and thought-provoking assessments, you can train your entire team from this robust course library. Take the courses right from the BIStainer system and store all training records in the same place.

# Training Record Management System

## Managing Employee Training Records Has Never Been Easier

The BIStainer Training Record Management System not only tracks and manages training records and certificates for courses completed through our LMS, but it also stores, tracks, and reports on training completed in the classroom, in the field, or on another system!

Using a convenient Excel upload feature, within minutes you can create hundreds of user accounts and upload thousands of training records.

- ✔ Certificate Management
- ✔ Expiry Alerts
- ✔ Auto Archiving
- ✔ Training Hours Reports
- ✔ Mass Record Upload/Update Tools

## FEATURES

Mobile Compatibility

Certification Management

Quick Upload Technology

Scheduled Excel Reports

Training Auto Assignment

Training Matrix Integration

## Training Matrix

Upload your organization's unique company roles and training topics, set training requirements and the courses that satisfy them, and quickly assign training to thousands of employees. The BIStainer Training Matrix can be set up with just three easy steps:

- ▶ Enter your company's roles and training topics
- ▶ Specify courses that satisfy the training topics
- ▶ Set training as required or optional based on the employee's company role and location

# Learning Management System

With BISTRainer you can access an enterprise-level learning management system (LMS) that includes a robust exam engine, an integrated eCommerce store, and a course permission management system.

BISTRainer is designed for companies with safety training needs. System features strongly align with safety making BISTRainer a perfect fit for any company's safety and compliance management program.

## FEATURES

Document Uploader

Multilingual Capabilities

## Competency Assessments

Training employees is important, but ensuring employees have the proper level of competency is critical. Well-designed competency assessments can help your company:

- Reduce overall company risk
- Find the best person for the job
- Improve efficiency
- Increase work quality

## Onboarding Orientations

Easily build your own online orientation using the BISTRainer orientation and course building engine. This powerful tool allows you to create a playlist of slideshows, images, videos, document uploader, digital forms, HTML5 activities, and more.

You can even use a mobile device to take photos and video on your work sites and upload everything into your orientations.

# Digital Safety Forms

## Online Safety Forms & Assessments

The online safety forms and assessments technology contains an advanced form building tool that incorporates drag-and-drop technology, allowing companies to easily build and administer thousands of forms online.

Each form can include checkboxes, dropdown lists, Likert scales, date and time stamps, as well as open text fields and electronic signatures. You can even add images and videos to provide additional information to people completing the forms.

## FEATURES

- ▶ Incident Investigations
- ▶ Hazard Assessments
- ▶ Competency Validations
- ▶ COR Audits
- ▶ Equipment Inspections
- ▶ Worker Onboarding
- ▶ Daily Toolbox Talks
- ▶ Near-Miss Reports
- ▶ Pre-Trip Inspections
- ▶ Tax Forms
- ▶ Field Level Risk Assessments
- ▶ PPE Inspections

# SafeTapp

## Offline Training Record Storage & Digital Forms

Your team can access a wide range of safety tools from their phones including all of their training certificates, safety forms, company policies and procedures, and more! Employees can download and store training certificates on any smart phone or tablet.

As employees receive more training and tickets, uploading everything onto SafeTapp is as easy as snapping a picture.

- ✔ Certificates
- ✔ Digital Verification
- ✔ Digital Folders
- ✔ Synchronized Records
- ✔ Digital Safety Forms

### ID Badges

In addition to the functionality already mentioned, SafeTapp can also be used to:

- ✔ Scan BIStainer generated ID badges
- ✔ Access the badge holder's training records

# Equipment Management

## Tracking Made Easy

Keeping track of equipment can be difficult. Finding the answers to common questions like, “What condition is it in?” or “What was the outcome of the last inspection?” can take hours. But what if these answers were available anytime, anywhere, on demand with any connected mobile device?

Our online equipment management feature simplifies the management process by centralizing all current and historical data in one location that is easily accessible by management and operators alike.

## Form Integration

### ▶ Preventive Maintenance

Create pre-shift inspection forms that can be completed by any approved employee. All data is stored in one central location.

### ▶ Annual Audits

Schedule third-party audits on your equipment to ensure proper maintenance and reduce costly breakdowns.

### ▶ Automatic Notifications

Set automated notifications to trigger when personnel identify defects, maintenance concerns, or potential safety issues.

### ▶ Scheduled Forms

Send regularly scheduled forms to authorized personnel or specific individuals based on the date or the mileage.

### ▶ Maintenance Tracking

View outstanding work orders, who they are assigned to, their progress, the last time they were updated, and more!

### ▶ System Reporting

Access on-demand detailed or summary Excel and PDF reports, and receive real-time alerts to keep you informed on many aspects of your safety program.
